October 2018

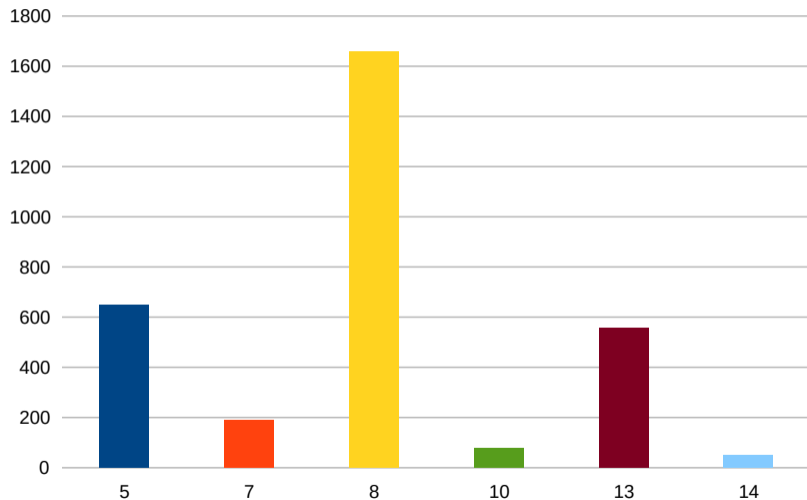

# Current status of DNSSEC in RIPE DB

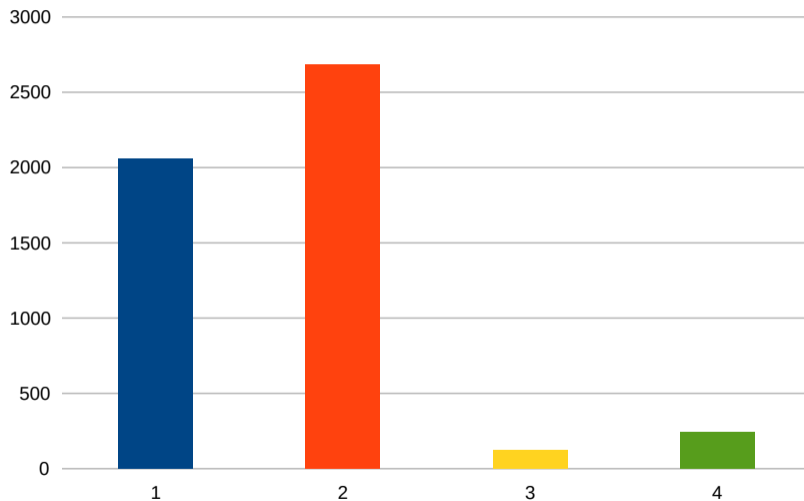

- 769 391 domain objects
- 3 135 objects with DS-rdata object (**0.41 percent**)

# Used algorithms

# Used digests

# Ideas for automatic DS maintenance

- should we support insecure -> secure bootstrapping?
- if not, should we scan all secure delegations for CDS records?
- if not, how should one opt-in?

Thank you!
