# Launch of a collaboration ?

---

- It appears that ETNO and RIPE (and the RIPE NCC) share a set of common issues and interests
- Idea raised that a collaboration could be put in place
  - No “a priori” ideas regarding the nature of the collaboration
  - Try to find a win-win relationship
  - Even if ETNO is “Europe” and “operators” defined, interests of the entire community have to be taken into account
- Your opinion is welcome !
