RIPE

Routing Working Group

RIPE 77
Amsterdam
October 17th-18th 2018

Administrative matters

- Two sessions, Wednesday afternoon, and regular time Thursday.

- This is an experiment.

- Discussions seem to be the most valuable part of the meeting but get cut all the time. There is more microphone time now.

- RIPE78 might move back to a single slot, possibly having two sessions every second meeting. We need your feedback.

Administrative matters

- Routing security is a continuing overall topic.

- Feedback on IETF BoF at RIPE 76 indicated interest in more detailed and focused insight on what is happening in routing area of the IETF.

- IETF needs your feedback too.

Agenda - Wednesday

- BGP Routing Policy Architecture

- TNT: Revealing or Detecting all MPLS Tunnels

- DB Non-Authoritative Route Object Clean-up

Agenda - Thursday

- BGP Route Security - Cycling to the Future

- Segment Routing (and why you shouldn't be afraid of it)

- Routing in the IETF

- Lightning talks
